Grady-White Freedom 325 Dual Console

Grady-White has designed the new Freedom 325 Dual Console with versatility, ease of access and style in mind. A standard portside boarding/diving door, accessible portside head and built-in swim/boarding platforms to stern make this 32-foot model a breeze to move around.

Touches, such as deep-cushioned seating in the bow, helm and cockpit make the Freedom 325 Dual Console comfortable. Grady-White hasn't forgotten about its anglers, either. Large bow storage boxes, plenty of rod holders, a 32-gallon livewell at the stern and a 254-quart aft insulated fish box come in handy during fishing trips. Boaters can retire to a starboard daybed console for a short (or long) nap. This model is powered by either 300- or 350-hp twin Yamaha four-stroke engines.
