

# GRADY-WHITE EXPRESS 330

**SPECS:** LOA: 35 ft. 10 in. • Beam: 11 ft. 7 in. • Dry Weight: 10,840 lb. (w/out engines)  
Draft: 25 in. • Transom Deadrise: 19 deg. • Fuel: 331 gal. • Max Power: 700 hp

“Customers who own this boat say the center helm design makes it ideal for long offshore runs because

of its superb visibility,” says Shelley Tubaugh, Grady vice president of marketing. “The arrangement of the

cockpit, which offers a spacious area to work, and an ample full-column-distribution livewell at the perfect height for netting and rigging live baits make this express model truly a fisherman’s dream.”

Other notable features include the large seating area beneath the hardtop, as well as the aft seat that flips down for socializing back at the dock, Tubaugh says.

The Express 330 debuted in 2001 and was crowned Boat of the Year by *Boating* magazine, whose editors observed that the sport-fisher “broke the mold” and “[redefined] the offshore battlewagon ... setting a new standard in quality and innovation.”

Grady makes upgrades each year to all its models. Along with those annual tweaks to the 330, Grady redesigned the helm and refreshed the cabin interior for 2015. For 2016, the company upgraded exterior seats and added its AV2 hardtop with an integrated windshield as an option. “With its broad appeal to fishermen, families and long-range overnight island-hoppers, this boat will remain a favorite for years to come,” says Tubaugh.
