GRADY-WHITE FISHERMAN 257

The Fisherman 257 epitomizes Grady's heritage of building ruggedly elegant coastal fishing boats. For 2022, Grady has re-engineered the boat's T-top for a sleeker, more stylish look. In addition to enhancing the boat's visual appeal, this new T-top has an easy-access, built-in net for charts or fishing gear. LED spreader lights and three tri-colored LED recessed lights illuminate the channel and make rigging bait a cinch as you leave the dock before sunrise. Other notable fishing features include 14 rod holders, three large fish boxes, and a livewell.
