

Grady-White

Grady-White boasts its new Adventure 218 has the widest beam (8' 6") in the 21-foot class. Designers packed a lot into the Adventure 218 (23' 3" LOA) while maintaining the walkaround concept.

Highlights include a cushioned helm, fish boxes behind the helm seats, and two integrated swim platforms aft.

For family water sports activities, Grady-White offers an optional retractable ski pylon that wasn't available on previous walkaround boats. The cabin has plenty of room for overnighting, and a covered head is to starboard. Two side windows and a forward hatch provide fresh air. Grady-White included two insulated fish boxes (246 quarts total) and storage for up to 10 fishing rods. Anglers can also add a 31-gallon livewell. gradywhite.com
