Grady-White Boats

MANUFACTURER'S REMARK

At Grady-White, we focus on combining innovation, performance, and safety all packaged in elegant luxury to delight our customers.

Grady-White Boats' attention to detail is as unchanging as its focus on continual improvement. Its boats feature the brand's exclusive SeaV² hull, and boast unsinkable foam-filled hull construction, true self-bailing cockpits, and iconic versatility, luxury, and value.

The celebrated brand builds boats from 18 to 45 feet in its Greenville, North Carolina, plant, with a total of 25 models in five design families: coastal explorer, center-console, dual-console, walkaround cabin and express cabin.

The company has received every third-party customer-satisfaction award ever presented in the marine industry.

Grady-White Canyon 271

Already an agile center-console sport-fisher with big-boat features, the popular Grady-White Canyon 271 now boasts a port cockpit side door and dockside power.

These amenities join fishing-friendly standard features such as lockable rod storage, deluxe full-feature lean bar, and a trio of fish boxes: two of 85 quarts each in the bow and one of 196 quarts in the cockpit, which also features a 32-gallon

insulated livewell with full-column distribution.

A bench seat faces a helm with a large, flush-mount electronics panel, Yamaha Helm Master EX digital electric steering, and hydraulic trim-tab controls. The large, scratch-resistant windshield is incorporated into the painted aluminum-framed T-top, which boasts rod holders and outrigger plates, among other attributes.

Comfort features include Grady-White's patented foldaway aft bench and a console with a tinted side window and ventilated head. A transom door makes boating large fish or accessing the swim platform easy.

Options include a leaning-bar upgrade, Command Elite helm chairs, stainless-steel outriggers with carbon-fiber poles, a Yamaha Helm Master EX full-maneuverability package and/or bow thruster, and an electrically retractable hardtop sunshade with Sunbrella canvas.

EDITOR SAYS

Grady-White became best known for its superlative walkarounds, but over the last two decades, the Canyon series has changed that. Built on the company's smooth-riding SeaV² hull, you can reach the offshore grounds while remaining dry and comfortable.
